yes, it is 6 years. If you could look up the citation that would be great. maybe it wouldn't hurt to meet for a few minutes- perhaps we could amend k4, 4 to have a subcategory for 6 year retention.

Thanks

Julie. Are you available Thursday morning?

Hi Julie,

You should also take Medicare/Medicaid into consideration as well since you bill providers. I pretty sure the retention requirement is 6 years. Pat knows this for sure, but let me know if you want me to look it up.

Also, would it be helpful to meet?

Let me know...Dina

Hi,

I'm not sure what change you are looking to make. I just looked at the Statewide Record Retention Schedule and Laboratory records are 3 years (K4 Laboratory, 4, Health Laboratory Tests, Clinical). Is there a separate entry for pediatric blood lead records? What is the current retention schedule?

Thanks,

Peggy

Hi Ladies,

I am working with the State Achieves group to define an appropriate category for retention of pediatric blood lead records (I'll probably define it more broadly - chemical exposure records). This is a 1-2 sentence description but I want to include the citations for retention regs. Can you provide those? Also would you be willing to take a quick look at the description after I write it up?

Thanks in advance,
Julie
